

## Expandet Ceiling Anchor

Expandet Ceiling Anchors are available in several types, and suitable for most kinds of suspended ceilings in concrete. See also Multi-Monti eye bolt for concrete, page 107.

CONCRETE

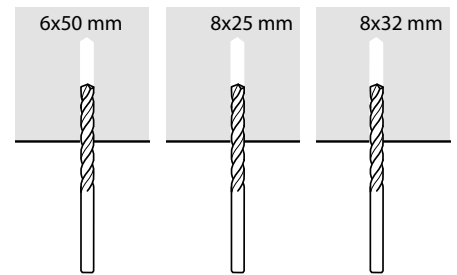

### ADVANTAGES

- Suitable for use of suspended ceilings
- Small drill depth
- Dimension 8x25 & 8x32 are suitable for fixing in hollow core slabs.

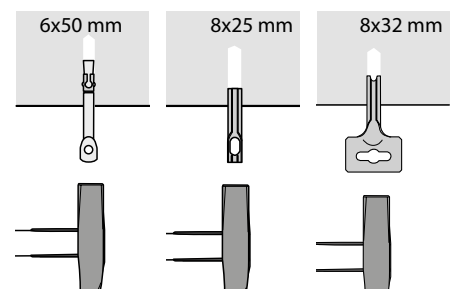

Type	Load capacities
DIMENSION	$N_{Rd}$
	Recommended Tension load kN*
6 x 50	1,35
8 x 25	1,00
8 x 32	1,00

\* Design tension loads are valid for a single anchor in concrete  $\geq$  C 20/25 not influenced by edge distance and/or spacing.

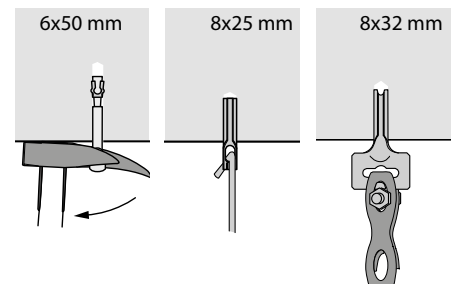

### INSTALLATION:

1] Drill a hole in correct diameter and depth

2] Hammer in the Ceiling Anchor

3] When the eye in the Ceiling Anchor is exposed to tension, it will expand in the material. When Ceiling Anchor is hammered into the drilled hole, it is compressed and presses the sides of the drilled hole. The parallel pressure on the entire surface in the hole provides a strong and secure fastening.

## Expandet Ceiling Anchor, hardened spring steel, black phosphated

Expandet Ceiling Anchor is suitable for fixing of suspended ceilings and temporary installations in concrete.
